*This Community Bulletin is intended to serve as an update for upcoming work related to the UW PHF project, as well as a means of notifying our neighbors of any significant events that may impact the sidewalks and streets surrounding the project.*

**What's happening in your neighborhood this month:**

Removal of utilities and installation of replacement utility service lines on project site will continue through the first week of June. This work helps to ensure that surrounding buildings will continue to have utility service as the PHF project progresses. Part of this work will involve the connection of utility lines near the existing ADA path passing to the west of Guthrie Annex 4. The path will be closed from 5/29 to 6/1 to allow the safe connection of sewer lines near the sidewalk.

As construction work progresses, heavy equipment shall continue to access and exit site from the construction entrance installed along the north end of the project site on 15<sup>th</sup> Ave NE.

June brings an increased presence of heavy machinery as site clearing, grading, and excavation activities begin. Earthwork activities are set to begin the week of June 11, with the driving of shoring piles taking place at the end of the month. Upcoming milestones for the month are given as follow:

Several small construction activities will take place beyond the boundaries of the site fence. All such activities will be coordinated in advance with the impacted parties by Mark Sweeters.

If you have any questions about the work we are performing in your neighborhood, please feel free to contact us and we are more than happy to provide information.
